

DEWEY TO START FOR HOME AT ONCE

Navy Department Receives Information.

INDICATES TERMINATION OF HOSTILITIES.

The Admiral May Return Via the Suez Canal Route—Generally Thought That the Hero Would Not Return Had His Services Been Needed—Mayor of New York Expresses Desire to Arrive First At that Port—Disposition Is to Let Dewey Govern Himself In This Respect.

Washington, May 12.—[Special]—The navy department has information that Admiral Dewey will start for home at once.

The navy department today directed that all mail for the Olympia, Dewey's flagship, be now sent to the United States navy's mail distributing agent in London. This would indicate that the admiral will return via the Suez Canal route. It would also indicate that a speedy termination of hostilities may be looked for, as Dewey would not have departed while his services were needed.

Secretary Long, in answer to a telegram from the mayor of New York, expressed the desire that Dewey arrive first in this country in New York, says the department is disposed to let Dewey govern himself in this respect, but says the understanding is that Dewey desires to return via the Suez Canal.

Archbishop of Manila, who is in constant touch with the Filipino throughout the island, is of the opinion that the revolt is fast approaching an end. This, he believes, is due partly on account of the lack of food and ammunition, but especially because of the wonderful progress made by the American army.

The supreme courage and determination of the American soldiers has been a great revelation to the Filipinos, consequently the demoralization among the people has been intensified by the numerous deceptions practiced by the leaders.

TROOPS TO BE RELIEVED SOON

Spanish Gunboats Recently Purchased Are Being Rapidly Armed.

Manila, May 12.—[Special]—The exhausted troops in MacArthur's division are soon to be relieved, as fresh troops are already being sent to the front.

Two battalions of the Seventeenth infantry have received orders to join MacArthur tomorrow and another battalion of the same regiment will go to Bacolor to reinforce Lawton.

The men of the Twenty-fourth, who arrived here yesterday from the United States will take the places of these men in the lines about the city.

The Spanish gunboats, recently purchased, have been placed under command of Captain Grant, of the Utah battery, and are being rapidly armed.

The petition of the men of that they be temporarily relieved from active service, does not meet with disfavor. The regiment is badly exhausted, not over three hundred being fit for service in the field. Some of them have not been able to wash their clothes for several months.

The officers of the regiment will present a similar petition to MacArthur.

Washington, May 12.—The decisive battle of the Philippine campaign is expected to take place near San Fernando, where the insurgents have an army of at least 10,000 men strongly entrenched. News of it may come at any time, and war department officials, apprised by Gen. Otis of the situation, are expecting it very soon.

Thursday, in notifying the department that he could not spare the volunteers, and that they were willing to remain until their services were no longer needed, he also gave the supplemental information that the decisive engagement at or near San Fernando would take place shortly.

In view of the fact that the insurgents are in such numbers immediately in front of MacArthur, while a strong body is near Manila, on the south, the secretary of war and Adjt.-Gen. Corbin agree that Gen. Otis acted wisely in refusing to let any of the volunteers start home.

THINK WAR NEARLY ENDED.

Washington Officials Encouraged by News from Otis.

Washington, May 12.—Gen. Otis has cabled the war department concerning the situation in the Philippines.

He says that it is very encouraging. The tone of the dispatch leads the officials here to believe that the end of the Filipino insurrection is near at hand.

Following is the text of the dispatch: "Manila, May 11.—Adjutant-General, Washington: Situation as follows: Succeeded in passing army gunboats to Calumpit for use in Rio Grande; railway connections with that point secured this week; passage of gunboats through Macabebe country halted with joyful demonstrations by inhabitants. "In country passed over by troops temporary civil administration inaugurated and protection to inhabitants

against insurgent abuses given as far as possible. "Signs of insurgent disintegration daily manifested. Obstacles which natural fears of country present can be overcome. OTIS."

The Return of Volunteers. In reply to the cable of Adjt.-Gen. Corbin last night regarding return of volunteers Gen. Otis cabled this morning:

"Manila, May 11.—Adjutant-General, Washington: Volunteer organizations first to return now at Negros and forty-five miles from Manila at front. Expected that transports now arriving will take returning volunteers."

Americans Should Strike Now.

Manila, May 12.—Mr. Higgins, manager of the Manila-Dagupan railway, and two of his assistants, who had remained inside the insurgent lines to protect the property of the railway company, arrived at San Fernando yesterday. They had been informed by the insurgents that they would be no longer responsible for their safety if they remained longer within their lines. Mr. Higgins corroborated the stories that have been told of the demoralization of the Filipinos, and says that the rebels are looting all the natives' property. Mr. Higgins adds that now is the time for the Americans to strike hard.

Tells of Volunteers' Return.

Washington, May 12.—In reply to the cable of Adjt.-Gen. Corbin last night regarding the return of volunteers, Gen. Otis cabled Thursday:

"Manila, May 11.—Adjutant-General, Washington: Volunteer organizations first to return now at Negros and 45 miles from Manila at front. Expected that transports now arriving will take returning volunteers. Volunteers understand they will begin to leave for United States the latter part of month. Know importance of their presence here at this time, and accept sacrifice which United States interests make imperative. OTIS."

Tells Otis to Push Things.

Hot Springs, Va., May 12.—"Force the fighting. Penetrate far into the interior and capture or destroy every warring Filipino." That is the pith of a long cipher cablegram President McKinley sent to Gen. Otis in Manila Thursday. It was prompted by several dispatches from Gen. Otis transmitted by Secretary Alger, which greatly encouraged the president.

### NEW AND NOVEL IMPLEMENT

Saves Much Labor on the Farm and Is Declared a Success

Farmers in this vicinity are much interested just now in the new lister and planter which has been introduced. It is a machine which prepares and plants the ground, all at the same time. It takes four horses to operate it. The farmer can go into his stubble field with this machine, and without further preparation, it will cut a trench seven or eight inches deep, drop the seed corn in drills and cover it up three or four inches. A cultivator is then used, which gradually fills up this trench, as the corn grows. No plow is necessary, neither is a disc harrow or planter used. It seems to do away with nearly all the work of farming. It has been in use for three years or more in Kansas, and is said to be a success there. Their success or failure will be closely watched by several of the progressive farmers of Rock and surrounding counties.

## ENTERTAINMENT BY MILTON SCHOLARS

### EFFORTS REWARDED BY LIB- ERAL PATRONAGE.

Those Taking Part and the Teachers Who Drilled Them Entitled to Much Credit—Grand Army Post and Woman's Relief Corps Will Decorate Soldiers Graves.

(THE GAZETTE AGENCY  
W. W. CLARK, Manager,  
Milton, Wis., May 10, 1899.)

The annual entertainment, by the public school, at the Seventh-Day Baptist church Thursday evening was well patronized and the program presented deserved it. All who took part, and the teachers who drilled them are entitled to much credit.

There will probably be no general observation of Memorial day here, except that the Grand Army Post and Woman's Relief Corps will decorate the graves of their former comrades. The Post has always been at front when public exercises have been held and have secured and contributed the funds to pay expenses incident to the occasion. They justly feel that the citizens have a duty to perform in this work and that the burden should be taken from their shoulders as the time must soon come when this labor will of necessity fall upon others. Therefore, they think that if the citizens will not take sufficient interest in properly observing the day, by providing speaker and funds to pay expenses, the Post cannot be censured if they decline to do so. In our judgment their position is a sound one.

Supt. Thorne spent Tuesday night in town.

Dr. Leonard G. Crosby, left for Johnson's Creek, Thursday, where he has decided to locate for the practice of his profession.

Miss Myra Campbell is at the Wadheim Sanatorium, Oconomowoc, where she will fit herself for the profession of a trained nurse.

Mrs. M. P. Fuller is here to spend the summer with her sister, Mrs. Clara Anderson.

The Graded school ball team went to Albion Thursday and beat the Academy boys by a score of 20 to 19, despite the fact that the Albion players oversized them.

There was a big boom in the lamb trade, wooded lots selling 25c higher and most choice clipped lambs 15c@20c above prices paid the day before. Heavy sheep were still slow sale at the reduced prices noted yesterday. Today's receipts were estimated at 9,500 cattle, 25,000 hogs and 12,000 sheep.

Mr. Anderson wanted it both for his own use and to supply it to his friends and neighbors, as every family should have a bottle of it in their home, not only for rheumatism, but lame back, sprains, swellings, cuts, bruises and burns, for which it is unequalled. ## ARBOR AND BIRD DAY DULY OBSERVED

### APPROPRIATE EXERCISES HELD TODAY.

Excellent Programs Were Given This Morning in the Public Schools By the Pupils—Scholars in the State School For the Blind Planted Trees.

Arbor and Bird Day was duly observed in the city of Janesville today. Appropriate exercises were held in the public schools during the morning.

The observance of Arbor and Bird Day in the public schools has grown out of the conviction of the people that in the education of children something more is necessary than a knowledge of books.

This day comes just when the birds, following close upon the heels of the retreating winter, seem in their glad notes to be exulting over the defeat of the forces of the frost king, and the breaking of the icy fetters with which he has bound the earth. At the same time they are sounding psalms of joy over nature's new birth as shown in the purling brooks, leaping rivers, and rippling lakes, smiling in the face of the "springtime" sun, like the smile of childhood responsive to the mother's loving glance, and caressing touch; as shown by the emerald green of grassy fields and leafy woods, and the unfolding flowers which, like gems of beauty, dot hillside, plain and valley, bursting into life under the magic touch of spring.

As the spring is the time of awakening life, the advance herald of the full rounded year, the budding promise of later fruitage, so the observance of Arbor and Bird Day in the schools should be the occasion for the awakening thoughts, ideals and interests which shall unfold and ripen into deeper reverence for life in its myriad forms, into wider sympathies, into gentler manners, into love of nature's beauties, and into nobler character. As the springtime is but the promise, the beginning of what the latter year is to realize, as it must be followed by the heat and by the refreshing rains of summer, and by the cool of autumn, so the exercises in the school on Arbor and Bird Day should be but the promise, the beginning of what is to be realized in the child's development throughout the year.

The lessons and suggestions of this day are but the seeds which need for their unfolding, development, and final fruitage, the life-giving rain and glowing warmth of intelligent, persistent effort by the enthusiastic, nature-loving, child-loving teacher in an appeal to the emotional nature of the child, followed later by the cool reasoning which justifies this appeal.

At the State School for the Blind exercises were held this afternoon that brought out a most excellent program that was much enjoyed by all.

The planting of a tree took place by the members of the second year High school class.

All Janesville has good reason to feel proud of the way the day was observed in the Bower City.

### RECEPTION FOR MR. THAYER

Local Members of the A. O. U. W. Will Meet Him At the Depot.

J. M. Thayer, of this city, has been honored for the third time by the Grand Lodge of Wisconsin of the Ancient Order of United Workmen. At the election of officers at Milwaukee yesterday afternoon, he was re-elected as Grand Master Workman for the third term. The election was unanimous.

Upon Mr. Thayer's arrival in the city this evening at 7:40, he will be met at the Chicago, Milwaukee & St. Paul depot by members of the local order and escorted to the lodge room, the procession to be headed by the Imperial band. After a brief session an adjournment will be taken to Concordia hall where a reception and dance will be given. The orchestra from the State School for the Blind will furnish the music. The affair is not public and will only be participated in by members of Olive Branch Lodge No. 36, A. O. U. W., and Laurel Lodge No. 2, Degree of Honor, and their families.

Every member of Olive Branch should turn out and give Mr. Thayer a royal reception.

A. O. U. W. Officer Twelve Years.

J. M. Thayer was born in St. Lawrence county, N. Y., in 1840, and came to Wisconsin with his parents when thirteen years of age. His parents located on a farm in the town of Johnston, where Mr. Thayer remained until his 20th year. He attended the public schools, and at the age of 20, became schoolmaster. He left this occupation to be a traveling salesman for an eastern firm. While engaged in this occupation he was married at Ogdensburg, N. Y., to Miss Charlotte Fredrick. He later located in Johnston, remaining there until 1880, and removing in that year to Janesville, where he has been engaged in the leaf tobacco business ever since. Mr. Thayer joined the Ancient Order of United Workmen twelve years ago, and has held office of some sort in it ever since the second meeting that he attended.

If you are going to boil a piece of meat, it must go into boiling water; if you are roasting meat, it must go into a very hot oven; if you desire to broil meat, put it just as near the hottest fire possible, turn and sear on the other side.

**MEAT TOAST.**—Meat toast is excellent made of part veal and chicken. Chop your meat fine, season very well with salt, pepper and a little onion. Make a white sauce, put the chopped meat into it and heat well; pour on buttered toast, and bread.

## ROCK COUNTY MAN DIES OF INJURIES

### B. F. EMERY PASSED AWAY THIS MORNING.

His Skull Was Fractured Wednesday At Evansville By the Breaking of Wire Fence—Was Seventy-Two Years of Age—Demise of Mrs. C. T. Wright.

At 1 o'clock this morning B. F. Emery died at his home in Evansville as the result of injuries received Wednesday afternoon while erecting a wire fence. Mr. Emery was seventy-two years of age and was a man widely known through the county of Rock.

Wednesday afternoon Mr. Emery and Henry Searles were building woven wire fence and had a stretch of about twenty rods; Mr. Emery, without thinking, tripped the stretcher with a hammer and the handle of the stretcher struck him at the base of the skull, fracturing it so badly that little, if any, hopes were entertained for his recovery from the start. Dr. Jackson of Madison, assisted by Dr. Stair and the Drs. Smith, performed an operation on Mr. Emery. The unfortunate man remained unconscious until the end came.

Mrs. C. T. Wright

After an illness of several months, the spirit of Mrs. C. T. Wright passed peacefully into the shadows of the unknown beyond last evening at 5:40 o'clock. Death occurred at her home, 156 South Jackson street and came as a relief and ended the sufferings which she had borne with wonderful patience. Six years ago she suffered a stroke of paralysis, since which time several have followed, the final one occurring about ten days ago. During these years the departed one has been practically helpless, but loving relatives and friends have done all within their power to alleviate the sufferings, especially her daughter Grace, who has with gentleness made many self sacrifices to care for her mother.

Mrs. Wright was in the sixty-second year of her life. Her maiden name was Della A. Robbins, and she was born in Chemung county, New York, November 8th, 1837. In 1859 she came west, finally coming to this city to reside. Here she has made her home for the past thirty-five years, making many friends and devoting her life to her home and family. For ten years she was a teacher in the public schools. She was twice married, her first husband being Sanford Wintermute, to whom she was married in 1859 and who died in 1863. Ten years later she married Christopher T. Wright. Besides her husband and daughter, Miss Grace A. Wright, she leaves a son, Dr. C. E. Wintermute, of Kibbourn City, Wis. An only sister, Mrs. I. A. Whiffen, of this city, also survives.

A. C. Ressegui.

The funeral of the late Ressegui was held this afternoon at 2:30 from the house on Benton avenue.

### ROCK COUNTY FARMER FOUND DEAD AT HOME.

Body Was Lying In Pool of Blood—Sheriff Appleby Was Notified This Morning—Chris. Watt Is the Unfortunate Man's Name—Inquest Being Held.

Sheriff W. H. Appleby was notified this afternoon that Chris. Watt, an eccentric character who has lived for many years on Rock River a few miles east of Edgerton, was found dead at his home. Justice Spencer visited the home and found the report true, the body of Watt lying, curled up in a corner of the kitchen, in a pool of blood. He returned to Edgerton and secured a coroner's jury, and repaired to the scene where an inquest was held. The neighbors say that Watt had been acting queerly for some time and was believed to be insane. Whether he took his own life or met death at the hands of others is a matter which the inquest will solve.

## "Ice Wagon" Tires.

Cheap bicycle tires are made of stiff fabric, covered with a thick layer of hard, heavily compounded rubber, usually "reclaimed" or rubber that has been used previously. They must be so made or the poor rubber could not last a month. They make the wheel run hard because such tires cannot be made soft and pliable.

Experts say that a wheel fitted with them moves like an "ice wagon."

We watch the tires furnished us as closely as we do our wheels. The Dunlop Tires we have sent out this year have surprised people who thought double tube tires could not be resilient.

## SLAYS THREE OF A FAMILY.

Michigan Young Man Shoots Seven Persons.

FAILS TO COMMIT SUICIDE.

Wife, Uncle, Grandmother and Father-in-law Are His Victims—Neighbor Woman and the Murderer's Child Are Also Slightly Injured.

Grand Rapids, Mich., May 12.—Joseph Harvey, 19 years old, living at Howard City, a small town thirty miles north of here, did his best Wednesday night to annihilate his entire family and then attempted suicide. The dead are:

HARVEY, MRS. JOSEPH, wife of the assassin.

PIERSON, MRS. CATHERINE, aged 70 years, grandmother of young Harvey.

PIERSON, ROBERT, aged 35 years, Harvey's uncle.

Dying: Laganschlager, John, father-in-law of Harvey.

Wounded: Harvey, Joseph, bullet in his head; will probably recover.

Harvey, infant child, shot in the head; slight.

Staton, Mrs., wounded in the neck.

Harvey lived with his grandmother and uncle on the west side of the town, near the city limits. He had been brought up by his grandmother from childhood, but married about a year ago. Wednesday night about 10 o'clock he shot and stabbed both his grandmother and his uncle and then went over to his father-in-law's house, two miles west of this city.

When he arrived there he said nothing about the terrible tragedy at home. He retired and remained in bed with his wife and baby until 4 o'clock in the morning. Then he arose and partially dressed. Without a word of warning to his wife of her doom he pointed a 32-caliber revolver at her breast and fired. The little child's hand was resting on its mother's breast and the bullet from the gun passed between the fingers, shattering one of them. He put three bullets into his wife's body.

The shots aroused Mrs. Staton and Mrs. Sarah Fullager, neighbors, who were sitting up with the body of Mrs. Laganschlager, Harvey's mother-in-law, who had died Tuesday night, and they ran into the room, accompanied by Mr. Laganschlager. Harvey opened fire on his father-in-law and shot him in the head. He also fired at the women, and one bullet scraped the skin of Mrs. Staton's neck.

After he had emptied one revolver the murderer drew another from his pocket and fired a bullet into his own head. The ball entered the left eye and is now lodged in the back of his neck. Then he crawled into bed beside his dead wife and was found there by the officers, partially unconscious.

The home of the grandmother, Mrs. Caroline Pierson, has a horrible appearance. After the news reached town of the tragedy at the Laganschlager home officers were sent to the Pierson home to investigate. This house is located at the outskirts of the city. The sitting-room offered a gruesome sight. The walls and floor were splattered with blood and sitting in a chair by a table was the dead body of Robert Pierson with five bullet holes in it, besides a large wound caused by a stab from a big butcher knife. Near one of the doors lay the corpse of the old grandmother in a pool of blood. The body was clad in a night robe and it is evident that, hearing the shot which killed her son, she had risen to learn the cause of the noise. She received one bullet in her breast and two in her neck.

After the young murderer had completed his frightful work he ransacked the house and took from it papers of value and certain sums of money. Then he went to the barn, hitched up his horse and drove to town, where he visited pleasantly with several persons with whom he was acquainted. About 10:30 he started for the Laganschlager home and retired immediately after his arrival there.

Friends can assign no reason for Harvey's acts. He seemed perfectly sane and was not under the influence of liquor.

## FREAK MARRIAGES.

Dwarfs and Giants Who Have Been Joined in Wedlock.

The marriage which took place recently at Bolton, England, of Charles Morris, a dwarf of barely three feet, known as General Small, to Sophia Goddard, whose height did not exceed that of her husband, was made much of by the British press, but many similar and more remarkable weddings are on record. Tom Thumb, who was hardly thirty inches high, married, in 1863, Lavinia Warren, who topped him by a bare inch. A child was born to them three years later, but it died while yet an infant. Tom Thumb himself died in 1883, and his widow some years later married another dwarf, with whom, and a troupe of pygmies, she appeared last summer. Her sister, Minnie Warren, who had been bridesmaid at the first wedding, likewise espoused one of her own stature in the person of Commodore Nutt, the best man on the same auspicious occasion. Two remarkable dwarfs—the smallest human beings, indeed, on record—were exhibited at a hall in Piccadilly. Their names were Lucia Larate and General Mite. The former, when 17, stood twenty inches in height and weighed under five pounds, while the latter was an inch taller, and four pounds heavier. These mites, who were a prodigious attraction, and received the distinguished honor of being exhibited to the queen, were married before an immense throng of people at St. Martin's church. To pass to the opposite extreme one may record the marriage of Miss Anna Swan to Captain Martin Van Buren Bates, which was solemnized some twenty years since. Bates, who was, for a giant, a remarkably well made man, stood about 7 feet 8 inches and weighed 278 pounds, while the bride was some two inches and 64 pounds less. To these two was born a child which, however, only survived its birth a few days. It certainly gave promise to rival its parents' giant proportions, for when it came into the world it measured considerably over two feet in length. Another remarkable marriage was that which took place on Nov. 30, 1892, at Huber's Museum, New York, when Chauncey Morlan, weighing 578 pounds, married Miss Annie Bell, who weighed 560 pounds. Without doubt they are the most weighty couple living.

## AMERICAN LOCOMOTIVES.

English Workmen Have Many Objections to Their Introduction.

English workmen do not view with complacency the introduction of the American locomotives on the Midland railway. They are not only an affront to their national pride, but they see in them a positive menace to the engineers' trades union, which has been one of the most powerful in all Europe. The American locomotive is placed on the rails in Great Britain at a cost of from 20 to 30 per cent less than the British makers can produce the same sort of a machine. So the working of the American locomotives is watched with much more than ordinary interest by men on both sides of the ocean. If the machines can be made thoroughly adapted to British requirements at such a saving of cost to the British railway companies, it means that the British maker must produce them at a like cost or else be thrown out of the market. That means lower wages to the British workman, and against that he will fight with all his characteristic obstinacy, as he has to the introduction of labor-saving machinery. Even the long-drawn out and disastrous strike which made possible the introduction of the American locomotive, has not taught them the whole of their lesson. There is even now a proposition on foot that the union of locomotive drivers shall adopt a rule prohibiting members from handling an American-made locomotive, when the engineers' union shall reach the conclusion, if it does, that the introduction of the American machine threatens seriously the wages of their trade.

## Feathers in Men's Hats.

If you chance to see a small feather showing from the bow of the ribbon band around a man's hat these days it does not necessarily follow that the wearer hails from the country. This is the up-to-date fad among hat manufacturers, and they say that the idea is going with a swing. Young, middle-aged and old men appear to favor the feather, and many of the representative producers are using the feather in order that their names will become identified with the exterior of hats, and thus the feather will serve as an advertisement.

## She Read the Tongue.

How many of us, when performing some difficult or painstaking feat with the hands, work the mouth in rhythmic contortions? Good News tells a story for our warning. The scene is laid in the schoolroom during the writing lesson. "Please, me'am," speaks up a little girl, "Johnny Smart is makin' mistakes in his writing lesson." "How do you know that, Ellen?" asks the teacher. "There's three capital S's in the copy today, and he's makin' I's." "Why, you can't see Johnny's pen." "No'm, but I can see his tongue."

**Man's Inhumanity.**  
"I don't see why it is that humanity must suffer in this way for the gratification of others. Why is it that so little consideration should be shown to the wishes and comfort of people who have to do things so as to get money? I'm oppressed." "What's the matter?" "My employer won't let me off to go and enjoy myself watching a six day bicycle race. It must be exciting by this time. I hear that some of the riders are so fagged out they go to sleep on their wheels."—Washington Star.

**Electricity and Plants.**  
Attempts to employ electricity in stimulating plant growth appear to have met with some success. Dr. Stone of the Massachusetts Agricultural college reports that in the case of 20,000 plants experimented with, the results show that germination is accelerated by the application of electricity, although the beneficial effect is obtained only within certain limits determined by experiment.

**Hirsute Statistics.**  
Blonde hair is finer than that of any other color. By actual count it has been ascertained that 400 hairs to the square inch grow upon the head of a blonde beauty. The brown comes next with 350, then comes the black with 325, and the red with 250 or 260. After counting the hairs growing on an inch square it has been estimated that on the head of a blonde there will be about 149,000 hairs, while a brown suit of tresses will have 109,000, a black 102,000 and a red 90,000.
